RETRO LOOKS

Willpak Industries offers up some retro looks for your new '08 and up Challenger with their new rear window louvers. They are probably the lone louver manufacturer to make it out of the '80s alive. They have seen growth with the introduction of the new retro-themed vehicles hitting the road, and now they're setting their sites on the Challenger. The louvers are made of aluminum and should last the life of the vehicle. In addition to the Challenger, they also offer louvers for the new Charger. If you liked the original Challenger ('70-'74) louvers, you can get them as well.

CUSTOM GAUGES

Speedhut's Revolution gauges are designed for high performance enthusiasts, racers, and restorers looking for accurate, stable, and reliable instrumentation. Every Revolution gauge incorporates a user settable warning light to alert of dangerous engine conditions and dual memory recall, but that's not all. Wiring harnesses and precision sensors are also included. Best of all, each gauge is totally customizable, so if you want the dial to match your paint or if you're looking for a different scale, no problem. Promo Code: JY09
